

Example 3: Working on a joint project

Each of you either work hard or goof off. If your friend works hard then you prefer to goof off. You prefer the outcome of your both working hard to the outcome of your both goofing off. And the worst outcome for you is that you work hard and your friend goofs off (exploitation of yours).

you \ friend	work hard	Goof off
work hard	2, 2	0, 3
Goof off	3, 0	1, 1

An alternative version of this can be that each person prefers to work hard than to goof off when the other person works hard.

you \ friend	WH	Go
WH	(3, 3)	(0, 2)
Go	(2, 0)	(1, 1)
