

Example 6: Common property

Two farmers are deciding how much to allow their sheep to graze on the village common. Each farmer prefers that his sheep graze a lot than a little, regardless of other farmers' action, but prefers that both farmers' sheep graze a little than both farmers' sheep graze a lot (in which case the common is ruined for future use).

 P2	Little	Lot
	P1	
Little	2, 2	0, 3
Lot	3, 0	1, 1
